

Record of Public Involvement – Crane Point CE/White Pine EA

- 10/16/2017 – Ranger Spencer presented to the Benewah County Natural Resource Committee
- 11/29/2017 – Ranger Spencer presented both projects to the Shoshone-Benewah Forest Health Collaborative
 - Provided project area maps of both projects
 - Solicited input from the collaborative on both
 - Issues raised: wanted to see a larger project area (both projects)
 - Were concerned about retaining access for the public (road decommissioning)
- 1/24/2018 – Ranger Spencer and select members of the ID team presented both projects to the Collaborative.
 - Crane Point – presented a draft of proposed units and treatments
 - Discussed watershed limitations – why we are potentially reducing the project footprint to 2 HUCs
 - Discussed road decommissioning
 - Collaborative was comfortable with what we have proposed and supported going out for scoping
 - White Pine – presented a basic project area map and asked for input related to developing a proposed action. The collaborative stated their preference would be to have input during alternative development. We agreed to put together a draft proposed action to bring back to them prior to scoping (will do so at March meeting)
- 2/12/2018 - Ranger Spencer spoke with Cajetan Mattheson, Natural Resource Director for the Coeur d'Alene Tribe. Requested information on how they would like to be included in collaboration on Crane Point and White Pine. Caj stated just send them the project information and that would be sufficient. Information was sent and minor comments were received.
- 5/2018 – Ranger Spencer presented unit maps to the Collaborative one more time and received support to move forward.
